

SUPERNAIT – The best sounding, best connected integrated amplifier.

Not just a stunning amplifier, an audio hub for the 21st century.

There is still room for innovation in two-channel audio and when it comes in the form of a new Naim integrated amplifier it's bound to be something special. SUPERNAIT is not just a superbly musical amplifier, it's an analogue and digital audio control and connection hub that just happens to have some of the world's best audio amplification attached.

SUPERNAIT's preamplifier section is directly descended from Naim's superlative reference series preamplifiers, and its power amplifier incorporates all the techniques and know-how that give voice to the traditional Naim qualities of rhythmic musicality.

WHAT DO YOU WANT TO LISTEN TO?

Along with sound quality, connection is SUPERNAIT's forte. The 21st Century has seen an explosion of music carriers, formats and delivery systems. With analogue inputs via both DIN and phono sockets, digital inputs via both coaxial and optical sockets, a combined digital optical/analogue front panel input and on-board re-clocked digital to analogue conversion, there's very little that SUPERNAIT can't handle.

SUPERNAIT is just as versatile with its outputs. In addition to the power amplifier speaker outputs, it carries separate record, preamplifier, bi-amp and subwoofer outputs, and a front panel mounted headphone output driven from a separate power amplifier.

Independent record and listen sections add to the versatility, and flexible input assignment means any input socket - analogue or digital - can be assigned to any source selection button. SUPERNAIT versatility knows no bounds.
