## ATC CDA2 MK 2 CD DAC Pre-Amplifier receives Roon Tested Certification

ATC is proud to announce that the CDA 2 Mk 2 CD, DAC Pre-Amplifier has received Roon Tested certification from Roon Labs.

roon  
TESTED

Developed as the ideal partner for ATC's latest P2 power amplifier and active speaker designs, the CDA2 Mk2 CD, DAC Pre-Amplifier combines convenient USB access to up to 24/384kHz PCM/Quad DSD high-resolution music streaming with an upgraded CD transport and a premium 32-bit DAC. It also offers dedicated headphone amplification and wider input selection, along with analogue circuits redesigned for an even wider, flatter frequency response with very low distortion.

Made in the UK, ATC's CDA2 Mk 2 preamp/player is supplied with IR remote control and is covered by a six-year warranty\*.

Roon is a rich and engaging way to browse, organise, and listen to music. Artist photos, credits, bios, reviews, lyrics, tour dates, and composers are located automatically, then interconnected by links to build a surfable digital magazine. Roon is also a multi-room, multi-user networked audio platform, it offers features such as bit-perfect playback, DSD and PCM up-sampling, multichannel support, and Signal Path display.

### What does it mean to be Roon Tested?

All Roon Tested devices are profiled by Roon's QA Team so that Roon can identify them and automatically configure its settings to be optimized for them. This means that you can now just plug them in to the CDA2 Mk 2 and know you will be able to enjoy the best in high performance.

### About Roon Labs

Roon transforms the experience of browsing music. Artist photos, credits, bios, reviews, lyrics, tour dates, and composers are located automatically, then interconnected by links to build a surfable, searchable digital magazine about your entire music collection. Roon also links all of your personal files with the millions of tracks available on TIDAL and Qobuz, so you can start with the music you know, then explore and discover new music from the world beyond your collection. Roon runs on most Mac, Windows, and Linux PCs as a server, with an Android or iOS smartphone/tablet used as a control point.
